PROFESSIONAL SUMMARY

Results-driven Software Developer with 1+ year building scalable RESTful APIs and microservices using Java and Spring Boot. Proficient in PostgreSQL, MongoDB, and Docker. Skilled in Agile workflows and CI/CD pipelines. Passionate about delivering clean, production-ready backend systems.

WORK EXPERIENCE

Java Developer
Mar 2025 – Present

PeLocal Fintech Private Limited

- Developed scalable Java/Spring Boot services, reducing API response latency by 20% through optimized query design.
- Architected microservices modules decoupling 4 core services, enabling independent deployments and improving system scalability.
- Managed multi-database environments (PostgreSQL, MongoDB) with connection pooling to handle 500+ concurrent requests.
- Collaborated with frontend and DevOps teams to integrate REST APIs ensuring 99.9% uptime for payment workflows.

SQL Intern
May 2024 – Jul 2024

Celebal Technologies

- Designed and optimized relational database schemas, improving data retrieval speed by 30% via proper indexing strategies.
- Delivered all assigned tasks on schedule across 8-week intensive program focused on industry-standard database practices.

PROJECTS

Customer Portal — PNB MetLife
Mar 2025 – Present

- Working on a large-scale customer portal serving 10+ lakh users, built with Java and Spring Boot on a microservices architecture.
- Integrated end-to-end payment workflows including Pay Later, QR, IPPB, and BASBA mandate flows using BillDesk payment gateway.
- Designed and consumed REST APIs, handled JWT-based callback decryption, and persisted transaction data in PostgreSQL/MySQL.

WhatsApp Bot Platform — PNB MetLife
Aug 2025 – Present

- Developed Spring Boot backend APIs for a WhatsApp customer service bot integrated with Meta WhatsApp Business Platform (Cloud API).
- Designed a database-driven template management system enabling storage, versioning, prioritization, and dynamic rendering of message templates.
- Implemented Single Sign-On (SSO) to provide seamless and secure authentication across multiple internal and external applications.

TECHNICAL SKILLS

LANGUAGES

Java | C | SQL

FRAMEWORKS

Spring Boot | Hibernate

ARCHITECTURE

Microservices | REST APIs | Layered Architecture

DATABASES

PostgreSQL | MongoDB | MySQL

DEVOPS & TOOLS

Docker | Git | GitHub | Postman | Maven

SOFT SKILLS

Agile | Teamwork | Problem-Solving | Time Management

EDUCATION

B.Tech — Computer Science & Engineering
IILM College of Engineering and Technology, UP
2021 – 2025

CERTIFICATIONS

AWS & React
Udemy · 2024

Java + DSA Bootcamp
Apna College · 2023
